

You know, Satelite radio, specifically XM Satelite Radio, is one of those services that I GLADLY pay for. EVERY FM BASED RADIO STATION that I have listened to plays the SAME SONGS over and over and over and over again. I CHOSE XM because I wanted the variety that it offers. I CHOSE XM because I find it safer to drive long distances since I don't have to CHANGE THE STATION when I get out of range. I CHOSE XM because of the different services that it offers, such as Weather, News, and now Local Traffic. When I travel in a city that has these services on XM, I can plan alternate routes and inform people that I will be running late if I have to. XM is WORTH EVERY PENNY that I have spent and will CONTINUE to spend on it. DO NOT IMPOSE the restrictions on XM. We as subscribers PAY for this service. I feel that it is EXEMPT from certain regulations because of this fact. I have heard some of the satelite radio BASHING commercials on FM stations. It makes me sick to think that some people are worried about what I am listening to. The one commercial I am thinking of states that a concerned parent has to change the channel so their children don't here "The F-word" when they get in the car. I only know of a FEW stations on XM where that word is ever spoken. Personally, if you're listening to that music, then your children will hear it eventyally anyway. I am PAYING for this service....I feel that I should be able to listen to whatever I want, whenever I want. I WILL NEVER listen to another FM station unless I HAVE TO for reasons beyond my control.

Oh, if you're going to get on Satelite Radio for offering local services, why don't you get on SATELITE TV for doing the same. I know they offer local news/weather. Why not allow Satelite Radio to do the same. WHAT IS THE DIFFERENCE???

A pleased XM Satelite Radio subscriber,

Joshua Bailey
